

# Join Our Study About Genetic Testing For Cancer Risk!

Michigan Genetic Hereditary Testing

**Project Aim:** Families at high risk for cancer can benefit from genetic testing. We will compare two clinically available strategies to increase uptake of genetic testing for hereditary cancer risk in primary care patients

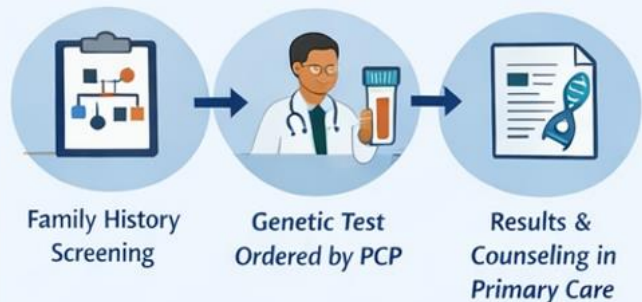

## Traditional Care Model

*Referral to Genetics Clinic*

## Point-of-Care Genetic Testing Model

*Genetic Testing in Primary Care*

## Why join us?

- ✓ Support equitable access to genetic testing services for your patient population
- ✓ Acquire practical skills and tools help discuss genetic testing with your patients in a streamlined way. CME credit available!
- ✓ Contribute to evidence that will guide how genetic testing is delivered in real-world clinical settings
